RADIO TRANSMISSION PROJECT
GENERAL MITCHEL FIELD, CUDAHY,

MEMO: TO MILWAUKEE RADIO AMATEUR CLUB INC.

FROM: DON MERTEN

RE: EVENING TECHNICAL COURSE IN RADIO TRANSMISSION

Due to the present emergency, the U.S. Navy, Army war departments, the American Radio Relay League, and the Bureau of National defense, request an all out effort be made to train competent men and women as radio operators. Therefor I have been advised to offer the services of the ~~personnel, and the~~ equipment of the N.Y.A. gratis to the Milwaukee Radio Amateur Club, for the training of such operators.

The course to be offered will include radio transmission(theory and operation) ,international morse code, and communications act rules and regulations. It is further suggested that the course of instruction be similar th that offered by the N.Y.A. for their day students, as the equipment for such a course, textbooks and code tapes are available.

Attendance, however, is not to be limited to amateurs, to members of Milwaukee Radio Amateurs Club, or to any age limit or group. The time and day(or days) of instruction to be decided later by all parties concerned.

I would appreciate an early written reply to this matter.

Sincerely yours,

Don Merten
Supervision of radio
N.Y.A. Aviation Center
